

Installation Guide

Magento 2

Show Hide Password

Version 1.0.0

Introduction

Magento 2 Show Hide Password Extension is used to prevent wrong input of a password using the eye icon. Users can reveal the password which they entered in the password field. Our extension uses an eye icon to hide the password.

Installation Steps

1. Upload Extension Folder

- Get an extension from our extension store or marketplace.
- Unzip the extension and upload the folder structure to your store root directory like the following image

2. Install and Activate the Module

Login to your SSH server and go to your root directory of Magento2 installation. Enter the following commands via SSH using Putty or others.

php bin/magento setup:upgrade

following is the example:

```
:/var/www/html$ php bin/magento setup:upgrade
```
