How to Upload 3D Model Files For Products:

The Admin will upload 3D model for Products to do so, the admin will navigate through **Catalog -> Products**, as seen in the screenshot given below.

- **3D Model File(Android)** : 3d Model(Android) File section is used to upload a media file (Image) for android and the format of the image for android is **GLB**.

GLB is a 3D file format that allows motion and animation and is used in virtual reality (VR), augmented reality (AR), games, and online applications. The format's modest size and quick loading times are further advantages.

- **3D Model File(iOS)** : The 3D model (iOS) File section is used to upload a media file (Image) for iOS (Apple) and the format of the image for iOS is **USDZ**.

Note :- For Android : The Admin needs to upload a .glb file on the product.

For iOS : The Admin needs to upload a .usdz file on the product.

Please note that the uploaded file size of products should be 20M Or More.

sys_temp_dir	no value	no value
syslog.facility	LOG_USER	LOG_USER
syslog.filter	no-ctrl	no-ctrl
syslog.ident	php	php
unserialize_callback_func	no value	no value
upload_max_filesize	20M	20M
upload_tmp_dir	no value	no value
user_dir	no value	no value
user_ini.cache_ttl	300	300
user_ini.filename	.user.ini	.user.ini

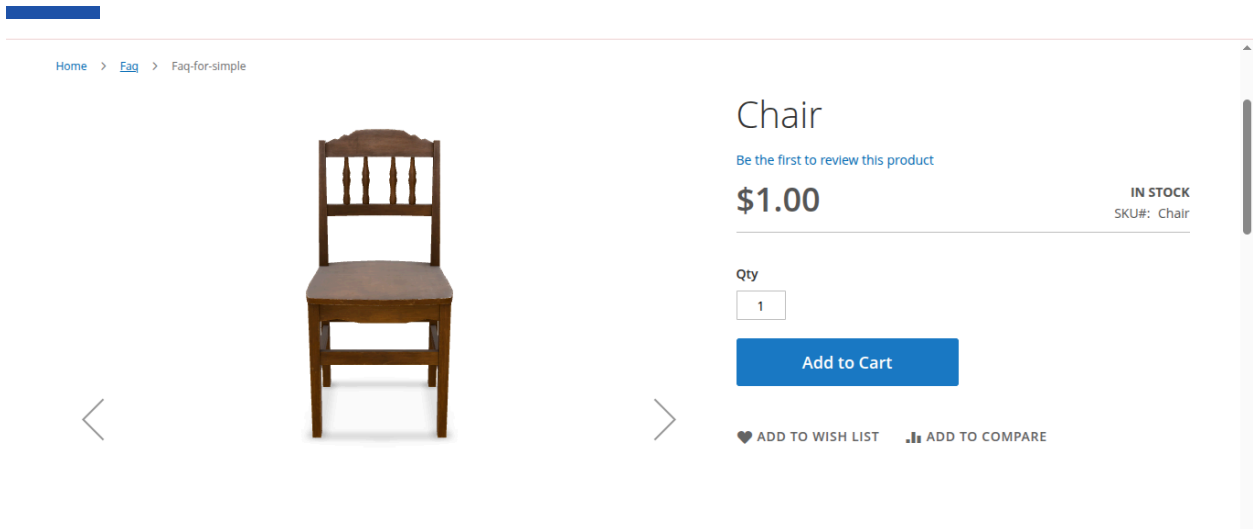

If “**upload_max_filesize**” & “**post_max_size**” less to 20M of your server then increase to both values from your server’s php.ini file.

output_buffering	4096	4096
output_encoding	no value	no value
output_handler	no value	no value
post_max_size	20M	20M
precision	14	14
realpath_cache_size	4096K	4096K
realpath_cache_ttl	120	120
register_argc_argv	Off	Off
